

# Helpful Apps for Parents

---

## [Study Blue](#)

With this app, you can make flash cards, take quizzes, and keep score to help you prep for a big test.

## [One Note](#)

One Note keeps all your school work, thoughts, ideas, and to-do's in one area. Bidulescu says she likes One Note because as a parent, she can refer to her child's One Note app to help answer questions she might not know the answer too.

## [Wolfram Alpha](#)

If you have a tough scientific question, rather than Google it you can use Wolfram Alpha to get answers.

## [Duolingo](#)

For students learning English or parents who don't know English, Duolingo can help bridge the gap.

## [Babylon](#)

Babylon is another app for those not proficient in the English language. It has a dictionary and a translator.

## [Easy Bib](#)

Easy Bib will help writing research papers much easier. Using the app, you can generate citations in MLA, APA, and Chicago formats for your bibliography.

## [Dragon Dictation](#)

Dragon Dictation makes taking notes a breeze! You speak into the phone and instantly see your notes. It's up to five times faster than typing on a keyboard.

Another app making headlines...

## [PhotoMath](#)

If your child's math homework is a little over your head, but they're still asking you for help, check out PhotoMath. Simply use your smartphone to a photo of the questionable math problem. The app will then be able to tell you the answer. Hopefully that will get you closer to figuring it out and being able to explain it correctly to your kids.
