

Warm - Up: Answer the following question on your desk with your partner:

What makes a living thing living? Be ready to share.

[Characteristics of Life Video](#)

Cell Observation Lab

At each station there are 3 mini stations. You will work for 15 minutes on each mini-station then switch when the timer goes off.:

1. **Micro-viewer** - view the slides and answer the questions in your journal in complete sentences. Title your page “Microviewer Cell Structure Lab” and add it to your Table of Contents.
2. **Microscope** - work with a partner to view the slides and answer the questions in your journal. If the instructions tell you to draw, then draw what you see. Title your page “Cells Observation Lab” and add it to your Table of Contents.
3. **Foldable** - Follow the instructions on the slide to complete the foldable in your journal. All of the information for the foldable is found in the powerpoint.

Ticket Out:

On notecard in complete sentences:

Three things I learned about cells in the lab are: (use the words cells, living things, structure, function)

1.

2.

3.

Put card in door on the way out!
